Identity

“Without tools like these we never could open our systems to external users.”—Michael R. Kimbell, IS Architect Identity Management, Directory Services Division, Hydro IS Partner

Norsk Hydro ASA Secures Systems Access to 50,000 Users

Norsk Hydro ASA is Norway’s second largest company, with operations including energy oil, gas, and aluminum production. A Fortune 500 company with 36,000 employees and offices in nearly 40 countries, it is a leading producer of oil and gas and the world’s third largest integrated producer of aluminum.

Challenges

- Provide reliable, secure access for the company’s 50,000 users
- Administer user rights and privileges
- Admit external collaborators on Hydro’s systems with full security
- Improve quality of personal data
- Secure administration of groups with shared privileges
- Ensure consistency between central and local registers

Solution

- Implemented Oracle COREid Access and Identity for secure access
- Applies security policies that define users credentials for access
- Accesses a centralized, secure system that is shared by all applications
- Allows secure access to external collaborators
- Centralizes updates at the highest security level, ensuring worldwide security and data quality
- Allows users to update their personal passwords
